

# ARTESYN LCM4000HV/LCM12K

4000 Watts Bulk Front End/12 kWatts Power Shelf  
Centralized Power for LED Horticulture Lighting

Advanced Energy's Artesyn LCM4000HV series and associated LCM12K mounting shelf has been designed specifically to provide a centralized current source for medium to large scale LED lighting and horticulture applications. The unique input design allows all standard AC inputs 208 VAC to 600 VAC from single to 3 phase sources. The output of each 4 kW block provides flicker free current source from 0 to 16 A at an output voltage range between 100 VDC to 300 VDC. High nominal operating voltage provides the benefits of lower cost standard wiring and higher efficiency with minimal voltage drop over long distance.

The convenient 19" 1U rack mount shelf is designed for hot plug replacement of the 4 kW modules insuring the highest reliability and simplest maintenance possible. For large systems stacking 10 shelves in a short 10U cabinet would provide 120 kW for a normal sized grow area.
