

VEHICLE LIGHTING

Light with identity

LED | Halogen | Electronics | Engineering

At NOLDEN, top quality is just a start. Our lighting solutions have been making the difference for over 40 years now. Along with our premium LED and halogen modules for any requirement, we are also specialised in the development of bespoke LED headlights in small-scale production – tailored exclusively and precisely to customer specifications. We will be glad to advise you personally and work with you to find the perfect lighting for your vehicles.

Bundled advantages

German engineering expertise	Unique light design	State-of-the-art premium LED technology	Three-year manufacturer's warranty
Maximum flexibility with plug-and-play modules	Complete packages, ready to install	Custom LED lighting in small-scale production	Reliable monitoring and electronics solutions

Our sectoral know-how comprises, e.g.

Automotive	Caravans	Motorcycles	Commercial and special vehicles
------------	----------	-------------	---------------------------------
